

Welcome to BAI! Ordering a machine is just a beginning.
BAI cares about your business growing!

Why choose BAI?

Reasonable pricing-High quality machines with high cost effective prices.
Responsible services-High efficiency communication before, during and after purchasing.
Reliable engineers' guidance-Lifetime and exclusive after-sales services.

What could you get from BAI?

Embroidery machines for starters---WE HAVE!
Embroidery machines for mature business---WE HAVE!
Embroidery machines for professional industrialized use---WE HAVE!

Mirror M22

- 400mm*600mm enlarged embroidery area, expanding your creative boundaries
- A smarter operating system makes you an embroidery expert
- Preferred by design digitalizing shop, embroidery shop and custom clothing store

Create Freely with a Single-head Machine

- With an outspread 400mm*600mm big embroidery size
- Smart Institch 5.0 operating system brings extreme speed experience
- True-Color 10" LCD Touch Screen

Mirror M22

PARAMETERS

ITEMS	DESCRIPTION
Heads	1
Needles	15
Maximum embroidery Area	400*600mm (15.7" *23.6")
Maximum speed	1200 spm
Memory	20 million stitches or 200 designs
Connection	USB / Network Cable / WIFI
Voltage	AC110V-230V 50/60 HZ
Computer	New self-developed institch 5.0 motion control system with high-Definition True-Color 10" LCD Touch Screen
Machine size	90*90*150cm (35.4" *35.4" *59")
Machine weight	180kg/397lbs
Packing	Wooden case
Package size	103*113*89cm(40.6" *44.5" *35")
Package weight	220kg/485lbs

Mirror M22

MAIN FEATURES

Language
Chinese / English / العربية / Türkçe/ Español / русский / Português / Français / Nederlands/Italia / Deutsch / Romanian / Polski/Viet Nam/ภาษาไทย/עברית

Efficient threading indicator system

High-precision wheel spring double detective system

Simplified thread clamping mechanism

Visualized hook system

High-strength titanium-plated needle

Plane curved cam wheel

Integrated guide rails combined with belts

Machine head arm
industrial 3D sandstone printing technology

Bottom basin
low temperature aluminum die-casting process

Retractable thread rack

Stand
whole tube is bent and formed in one piece. Reduce the difficulty of assembly

Self-developed institch 5.0 high-speed operation control system

Automatic thread trimming and automatic color changing

Support photo embroidery, 3D embroidery

Intelligent pattern combination and segmentation

Memory Capacity of 20 million stitches or 200 designs

Smart appliqué process

Automatically embroidery frame adding

Support USB/network cable/WIFI transmission

AR scanning intelligent demonstration function

Automatic refueling function

Red laser pointer

INSTITCH EMBROIDERY SOFTWARE

Institch Design

Embroidery Designs Faster

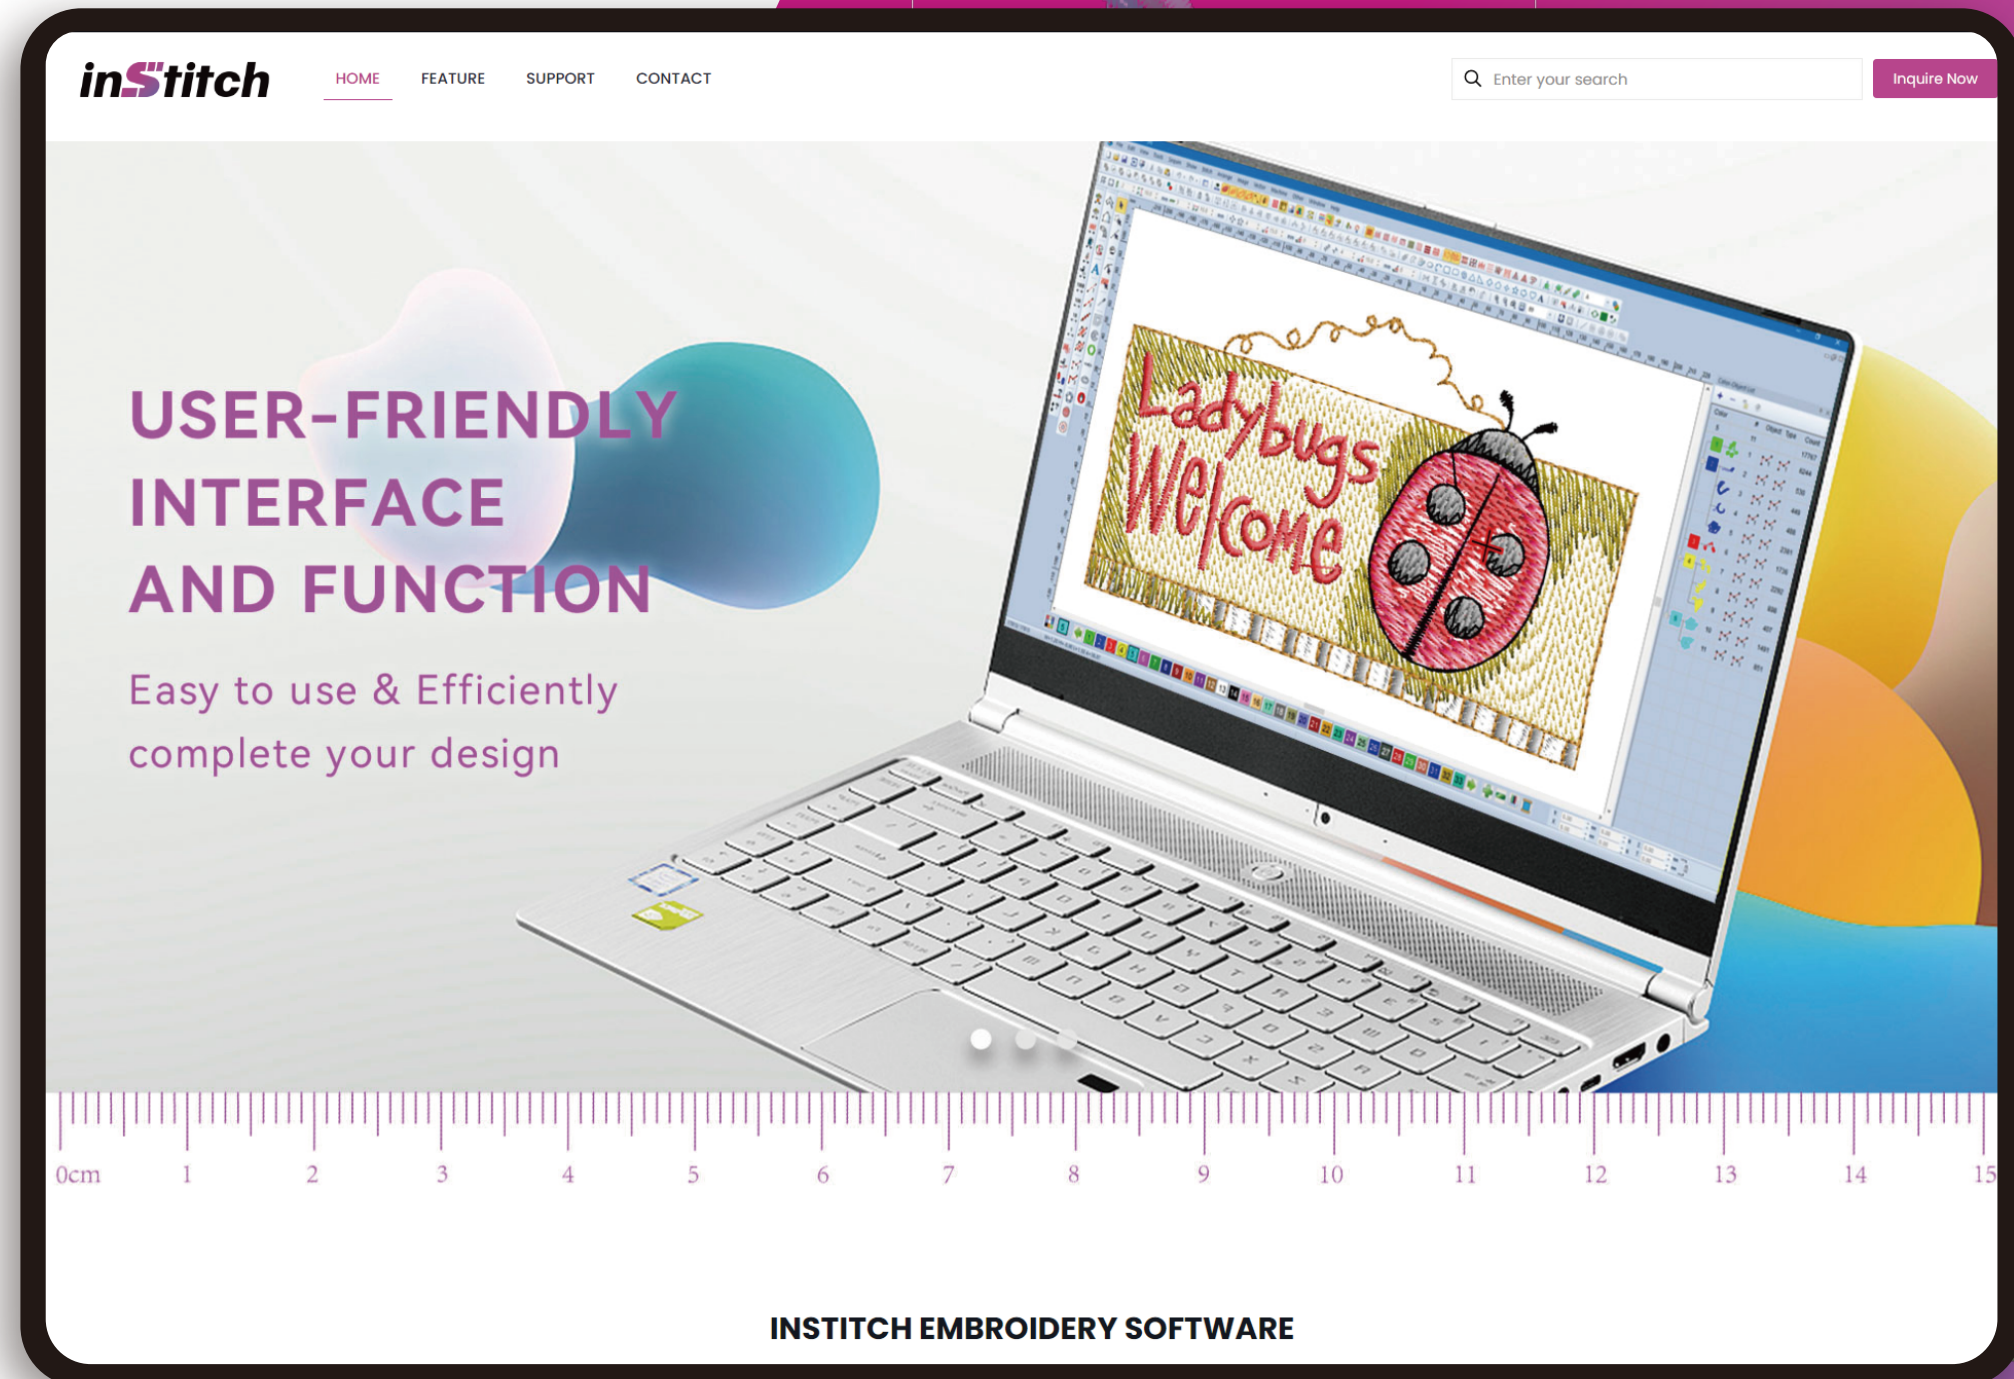

Embroidery Designs Better

Embroidery Designs More Efficiently

inStitch

Explore the function features of the institch that will help you complete your wonderful embroidery designs faster, better and more efficiently.

INSTITCH EMBROIDERY SOFTWARE

INSTITCH EMBROIDERY SOFTWARE

Professional
Deeply meet your functional requirements

Exhaustive
All the functions you need can be found here

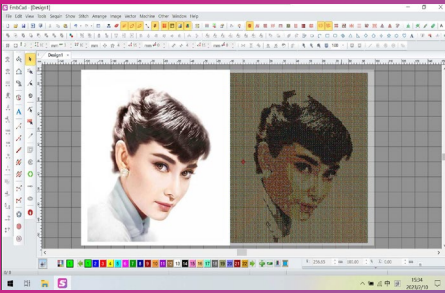

Efficient
Greatly improve your design efficiency & output

User-friendly
Give you the best software use experience

FUNCTION FEATURES

AUTO-DIGITIZING

1-click conversion of bitmap and vector art into embroidery. Institch will suggest the ideal colors, shapes, and sequencing.

You can create and edit vector graphics directly, and you can insert or paste vector graphics created in a third-party drawing package to use as a digital background.

With the photo embroidery function, you can generate embroidery objects in four colors from your image files in any format. For example, JPG, BMP, etc. You can set their cell size to adjust the stitch size of the generated embroidery object. In addition, you can set the contour split line to remove the background.

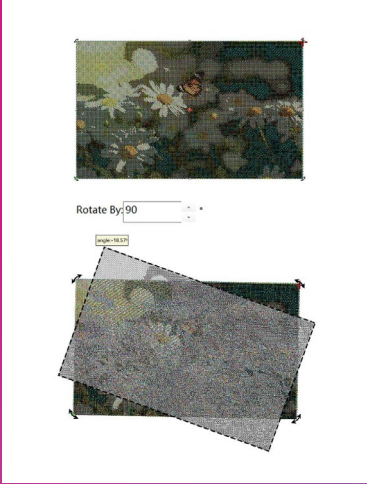

MANUAL-DIGITIZING

Manual digitizing is available. Institch software provides rich digital tools to save time and produce special effects and machine functions, such as: Manual single needle input, Flat needle input, Center input, Opposite side input, etc.

There are also many special input tools for digitizing circles, stars, and rings, as well as special methods for adding contour lines, filling in holes, and strengthening contours, which are convenient to use.

If your machine supports hole carving or sequin embroidery, you can also use Institch software to digitize these effects.

EMBROIDERY EDITING

When you have digitized your pattern design, you can modify it as a whole, editing a single object or a single stitch.

Institch software enables you to quickly add objects to pattern design by copying existing objects. It also allows you to combine pattern design by inserting the contents of one file into another.

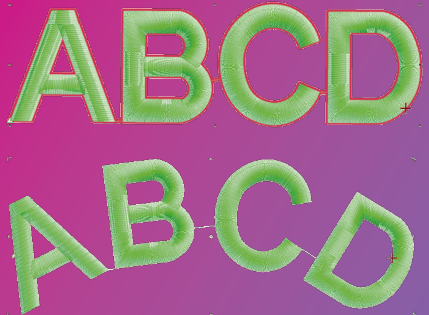

By moving, scaling, and transforming objects in the pattern design, you can change their position, size, and orientation. Institch software also allows you to manually insert machine functions.

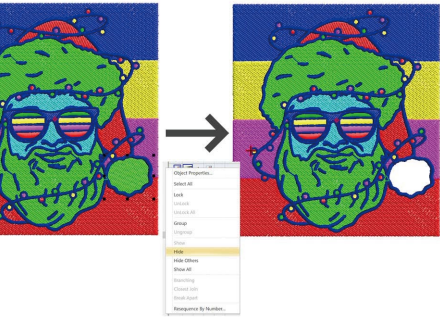

166 EMBROIDERY FONTS

With Institch, you can easily add and create your own text in your design.

166 professionally digitized fonts is offered by our experts for the very best quality embroidery lettering available today.

You can quickly and easily add special characters and symbols and then modify them directly on the screen. You can use formatting for text objects in the same way as word processors, including italic, bold, and left and right alignment. You can use horizontal, vertical, and curved baselines for your text objects. With Elastic Text you can also deform the shape of the text.

FLEXIBLE VIEWING

Institch software provides many ways to view pattern design.

You can display or hide object contour lines, stitch points, connecting lines, stitch angles, machine function symbols, and stitch itself. You can also show or hide selected colors.

You can zoom in on an area to see more details, or view a single stitch. You can use grid lines to accurately align or size embroidered objects. You can move along the whole pattern design instead of scrolling, or quickly switch between the current screen and the previous screen.

INSTITCH EMBROIDERY SOFTWARE

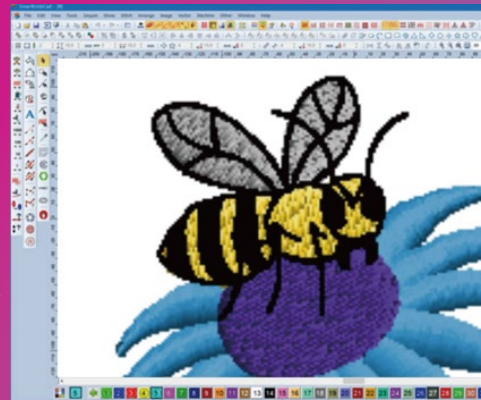

6

USER-FRIENDLY INTERFACE

Institch pattern design software attaches great importance to the humanization of the operation interface and functions.

We had conducted a lot of research and invited experts and designers to improve the operation interface of the software several times, making the operation interface very friendly to users.

With Institch pattern design software, even if you are a novice, you can also become an embroidery worker with high output. Just work with Institch and enjoy the convenience Institch brings you.
